

1 Going to canteen later than what was safe

Did you ever go to the canteen at an arrival time later than what was safe according to your previous answer? Why or why not?

1.1 Yes

1. Code for participant: luykbvrv cutoff2 answer: Yes. Because you learn more and more about the game as you play it.
2. Code for participant: 4vnbdkgv cutoff2 answer: Yes, initially they seemed to always want to go to the canteen
3. Code for participant: it43ekje cutoff2 answer: Yes, because it was possible, to go there safely and intuitively made sense
4. Code for participant: ovpi7o74 cutoff2 answer: Yes. There's a 50/50 chance that the other will arrive earlier, and thus have time to go to the canteen.
5. Code for participant: 4h5bhqj6 cutoff2 answer: My teammate was doing so. So I adapted to what he thought was a safe time. His safe time was 8:30 I found out.
6. Code for participant: 31ff8gvx cutoff2 answer: I did then, but now I would not
7. Code for participant: rakdg3dg cutoff2 answer: Even if there is no "safe" time, there are times where there is a good chance
8. Code for participant: eu1ft65 cutoff2 answer: yes
9. Code for participant: 1jxe8x0j cutoff2 answer: Yes, there still is a chance that we can get coffee if I arrive at 08:50 and my colleague already is there.
10. Code for participant: gm01kvol cutoff2 answer: Yes. The other player always took his own best move, so I had to calculate with that
11. Code for participant: gsvqidzt cutoff2 answer: Yes, because he could have had 8:40
12. Code for participant: x3xi6vwr cutoff2 answer: Yes because I knew the other player were always going to the canteen unless he arrived at 9:00, so I tried with somewhat certainty to go to the canteen at 8:50.
13. Code for participant: pkriwkms cutoff2 answer: Yes, because as long as it is 8.40 or before, it is relatively safe, as long as the opponent does the same
14. Code for participant: nqj339em cutoff2 answer: Yes at 8.40 I Will go to the canteen sometimes

15. Code for participant: fzi7n2cn cutoff2 answer: I did in the later rounds because I picked the wrong location a couple of times when I had 8.50.
16. Code for participant: 3nyzsmpe cutoff2 answer: It is never safe, but we got to have some trust :)
17. Code for participant: 62drd1wd cutoff2 answer: Yes, 8:50 since the chance was 50%.
18. Code for participant: uwks3ti cutoff2 answer: Yes, at 8.40 it would be 50/50 whether he want to the canteen or not, so I would often chose the canteen.
19. Code for participant: flkb63rpz cutoff2 answer: Yes. Because of the history of our answers.
20. Code for participant: q0ragkjk cutoff2 answer: Yes, at 8:40. Because it seemed almost safe
21. Code for participant: qx6yytx4 cutoff2 answer: Yes as my partner and I developed a strategy for going to the cantene when there was a chance one of us came
22. Code for participant: kzz2ozls cutoff2 answer: Yes, before 9:00
23. Code for participant: gt6pemo0 cutoff2 answer: My safe answer was 8:40, but I went to the canteen at 8:50, because my colleague could have arrived at 8:40
24. Code for participant: mcy6m2yg cutoff2 answer: Yes
25. Code for participant: w1doycxj cutoff2 answer: Yes, 10 minutes past because i assumed he would
26. Code for participant: mcnnxew cutoff2 answer: Only in the first few rounds before I realized the strategy.
27. Code for participant: q1gi5k8m cutoff2 answer: Yes, based om my partners choice om 8:50
28. Code for participant: eex9f34c cutoff2 answer: yes, this time was establi-
hed late. And since I dont know if my partner is at the safe point or not,
It becomes a gane of chance.
29. Code for participant: a6280itn cutoff2 answer: Yes.
30. Code for participant: degv17zm cutoff2 answer: Yes, in order to minimise
lose
31. Code for participant: reoi4tcq cutoff2 answer: I did sometimes, as a bet
because I could see my colleague going there.

32. Code for participant: vc1ljavg cutoff2 answer: yes
33. Code for participant: bvrck71g cutoff2 answer: Tried to figure out a strategy from my colleague.
34. Code for participant: k7w2uxa9 cutoff2 answer: Yes. I did not think the game strategy through
35. Code for participant: oxpd0w50 cutoff2 answer: Yes. Very risici but took the chance
36. Code for participant: q0ehudqy cutoff2 answer: Yes Cause my safe time was one hour before work
37. Code for participant: p5uvm2k4 cutoff2 answer: Yes at 8.40 because that is what makes 8.30 safe 8.40 is then unsafe so you take very uncertain to minimize loss
38. Code for participant: fd0h0ps5 cutoff2 answer: Yes - I took a chance and wanted coffee.
39. Code for participant: f6nirzuw cutoff2 answer: Yes I did, but then I could not be very certain
40. Code for participant: 6yjpscl6 cutoff2 answer: Yes, sometimes I'd choose to go to the cantine at 8.50. 8.40 is an obvious safe time, whereas the 8.50 is an edge case where both answers can be true, depending on when did your colleaue arrived. As we didnt agree beforehand, sometimes it wasnt safe. And as I had the feeling that my colleaue didnt make consistent decision in those edge cases, It was kind of a lottery what will he choose (from my point of view)
41. Code for participant: f308g8k0 cutoff2 answer: Yes, sometimes at 8:50 based on a random decision because it was possibly still safe.
42. Code for participant: fpbnodjr cutoff2 answer: Yes, at the end I decided to go to the canteen when I arrived at 8:50 because that's what seemed to happen a lot
43. Code for participant: xirgy2as cutoff2 answer: No, I could not be sure that the other one did not arrive at 9.00
44. Code for participant: 1rwicug6 cutoff2 answer: yes. because going there and reducing the certainty is cheaper. It makes sense always go to the canteen as, if the colleague does the same, the expenses are lower
45. Code for participant: sf4kl2zo cutoff2 answer: Yes. Unsure
46. Code for participant: lzejws5v cutoff2 answer: Yes i did go to the cantina later, becuase of the Way the other participant earlier decided

47. Code for participant: cr99q5qc cutoff2 answer: Yes
48. Code for participant: filxkq9g cutoff2 answer: In the beginning when i did not know the fall out
49. Code for participant: 86wga0kd cutoff2 answer: Consistency
50. Code for participant: 0iusd3w7 cutoff2 answer: Yes, the gamble at 8.50

1.2 No

1. Code for participant: 8kszs2jr cutoff2 answer: I don't think so
2. Code for participant: 7ms9gjyn cutoff2 answer: No. I was always thinking about which time my partner could arrive.
3. Code for participant: arzg04dp cutoff2 answer: No
4. Code for participant: uvof5pmo cutoff2 answer: No
5. Code for participant: nasxyu56 cutoff2 answer: No, because I was fairly certain they would choose office past this point.
6. Code for participant: 64fm81ni cutoff2 answer: Idid not
7. Code for participant: 4yr77tx5 cutoff2 answer: No because I thought you weren't allowed to
8. Code for participant: zyqoeys0 cutoff2 answer: i don't think so
9. Code for participant: eyjr8956 cutoff2 answer: No
10. Code for participant: 9uuut467 cutoff2 answer: No, it seemed unsafe
11. Code for participant: qligwzt1 cutoff2 answer: No
12. Code for participant: hil578bg cutoff2 answer: No. But it seemed like my partner did twice and then changed tactic
13. Code for participant: d5y5e89t cutoff2 answer: No - if I went at 9:00, he could lose a Big bonus from a Certain office run
14. Code for participant: ymmxmz1w cutoff2 answer: No I did not. If I went later it would be 9 o'clock or more and that would be to late according to the rules
15. Code for participant: wzhp90 cutoff2 answer: No, but I picked 9.10 so that isn't possible. It would however always make us pick go to the cantine and being very certain, making us loss the least amount of money. But it would go against the "rules" of the game, however since it was possible to pick going to the cantine after 9.00 I guess it's just a suggestion.

16. Code for participant: ury717cx cutoff2 answer: No
17. Code for participant: getiy58s cutoff2 answer: No.
18. Code for participant: pqam12mx cutoff2 answer: No, because if I get at time of for example 08:40, the opponent might have 08:50 and could think that I will be at school at 09:00 (thus, choosing to go to the office directly).
19. Code for participant: qjr2w7tc cutoff2 answer: No, I tried to be consistent.
20. Code for participant: 616gaqw2 cutoff2 answer: No, but that would have been safe to do in some cases.
21. Code for participant: tgsev17z cutoff2 answer: Don't think so, but I might have done it once in one of the early rounds. Generally, seemed too risky.
22. Code for participant: 8yh3xx1b cutoff2 answer: No
23. Code for participant: m9ilrfce cutoff2 answer: No there was no point

1.3 Misc

1. Code for participant: 0l0vhs3w cutoff2 answer: After 1 office, just always canteen for me. If one always picks the same, the other has an easier time to guess it.
2. Code for participant: w0v03hi4 cutoff2 answer: I went to the canteen once at 9 o'clock assuming that my colleague was waiting for me there (he was always there). - And I was right, but unfortunately I got a penalty since this was not safe.
3. Code for participant: mj8r5vux cutoff2 answer: Don't have time to answer.
4. Code for participant: v8ndw0x0 cutoff2 answer: I don't remember
5. Code for participant: ul32r8je cutoff2 answer: I dont have time to answer this
